

Are you challenged by limited time, lack of access to training by knowledgeable instructors with real world experience, and a need to meet the ever

changing fire and EMS certification and continuing education training requirements for your volunteer fire department, EMS and rescue personnel?

Fire and EMS Training Programs for Texas Volunteer Fire Departments

For over 20 years Fire & Safety Specialist, Inc. has sought ways to:

- ↪ Give you a timely, cost-effective way to meet your Fire and EMS education and certification needs.
- ↪ Help you improve the level of service your personnel provides to your community.
- ↪ Deliver high impact; high caliber training sessions within time constraints to meet your schedule.
- ↪ Instruct and produce the most knowledgeable Fire and EMS Providers and responders in Texas today.

All Fire Service courses are:

- ↪ Designed to meet or exceed SFFMA Certification Program requirements
- ↪ Qualify for reimbursement under the Rural Volunteer Fire Department Assistance Program, also known as HB 2604 as administered by the Texas Forest Service. Our staff can assist you with completing the TFS reimbursement paperwork if needed.

Fire and Safety Specialists, Inc. staff consists of state and nationally certified and accredited instructors. Our training programs listed on the other side are all based on real world experiences and functional operational practices. We offer a turnkey approach to fire and EMS training delivery and management.

Contact Fire and Safety Specialists, Inc. to schedule training to meet your agency and personnel's specific needs. Neighboring departments can be invited. Courses will be delivered in your stations or the location of your choice. A minimum of 15 attendees is required per class.

**FIRE &
SAFETY
SPECIALISTS, INC.**

To schedule training at your location that meets your needs or get answers to your questions about our training programs, contact **Louis N. Molino, Sr.** at **979-690-7559** or by cell at **979-412-0890** to discuss your specific fire department training and certification needs.
